

The Expert in Lubrication Solutions

The exit from nuclear energy is demanding more flexibility from conventional power plant operators. Maintenance departments are constantly faced with new challenges like frequent load changes and longer shutdowns. Individual automatic lubrication systems meet these challenges and can increase the economic efficiency of the plant.

Lubrication points

• Roller bearings

Material transport		
ightarrow Transport	Portal scraper, belt conveyor	✓
ightarrow Loading	Ship unloader, crane	✓

Processing		
ightarrow Crushing	Impact hammer, coal mill	✓
ightarrow Dust removal	Fans, electric motors	✓
ightarrow Transport	Conveyor systems	✓

Post processing		
ightarrow Dust extracting	Fans, electric motors	✓

Challenges

- → Frequent load changes
- → Longer shutdowns

- → High maintenance costs
- → Insufficient staff
- → Spread out equipment with many different lubrication points

→ Increased risk of workplace accidents at hard-to-reach lubrication points and due to high temperatures

Advantages of automatic lubrication

Continuous relubrication at short intervals **reduces wear** and **seals** lubrication points even during longer shutdowns.

Reliable lubrication for frequent load changes.

Scheduled exchanges of lubrication systems while machines are running reduces staff- and material costs and **increases economic efficiency**.

Quick and easy installation and exchange of lubrication systems outside of dangerous areas **increases workplace safety**.

Solutions

Direct mounting on lubrication point: e.g. perma CLASSIC / FUTURA / FLEX / NOVA

- → Easy, quick mounting
- → For lube-points with little vibration / shocks
- → For easy-to-access and safe lubrication points

Direct Mounting SolutionUse extensions, angles & reducers depending on the installation situation

Remote mounting to lubrication point: e.g. perma STAR VARIO

- ightarrow For lube-points with strong vibration / shocks (isolation of lubrication system)
- ightarrow When workers' safety is at risk: Mounting in safe areas
- → For hard-to-access lubrication points

perma STAR VARIO with LC 120

Remote Mounting Solution Use extensions, angles & reducers depending on the installation situation

Applications

Lubrication of flange bearing on support rollers

Lubrication of flange bearing on a bucket conveyor

Lubrication of pillow block bearing on a conveyor

Lubrication of pillow block bearing on a drive shaft

Lubrication of pillow block bearing on a fan

Lubrication of drive shaft on a fan

Lubrication of pillow block on fan

Lubrication of electric motor

Lubrication of electric motor and shaft on a secondary air fan.

Individual solutions

perma Product portfolio

Solutions for all types of applications

perma Lubricants

Large selection of high quality lubricants to meet the requirements of your equipment

perma Accessories

Extensive range of accessories and connecting parts for your equipment

perma SERVICE

Project planning, installation and maintenance

perma SOFTWARE

Calculation of lubricant amount: • perma SELECT

Maintenance Lubrication Program: • perma MLP
