

HYDROCLEAN SERIES

HC200

SANITARY CONVEYORS

Durability meets cleanability with our stainless steel HC200 conveyors, designed for the food, beverage, and pharmacy industries. The pull-pin design allows the conveyor to be quickly, easily and tool-lessly disassembled for cleaning, including high pressure washdown with chlorinated cleaners.

FEATURES AND BENEFITS

BUILT TO BE CLEANED

Each HC200 conveyor features a pull-pin design that allows the user to release tension on the belt for

removal of the conveyor for separate cleaning. No tools required.

NSF & BISSC CERTIFIED

HC200 conveyors have been independently inspected by both NSF

and BISSC. The conveyor features rounded edges to prevent standing water by

CROWNED PULLEYS

ensuring the belt's natural tendency to run centered on the longest part of the conveyor.

V-GUIDED BELTS

V-guides and V-guided belts are standard on all HydroClean Series conveyors to ensure positive

tracking. FDA approved belting and plastic chain belting are also available for applications which require it.
